

Strip and Split the Cable – not your fingers.

Removing the encapsulation from single and multiple lines, electric or hydraulic, used to be a chore. Not any more!

AnTech's Stripping and Splitting tools make the task quick, simple and safe. A job lasting for hours in the past is now completed within a few minutes.

Special cutting knives in the tools ensure that individual lines are not damaged during stripping or splitting.

The range of Stripping and Splitting tools greatly simplify the job of removing encapsulation from lines with no more risk of damaged cable or cut hands as with previous manual methods.

The range consists of the following products:

- Hand Stripper
- Air Powered Stripper
- Air Powered Splitter
- Hand Splitter
- GunDog Stripper (Available soon)

Features and Benefits.

- Operator Safety – Virtually eliminates the risk of injury.
- Simple to Use – One man can complete a stripping and splitting task singlehandedly.
- Prevents Line Damage – Unique design prevents and damage to the internal metal line(s).
- Flexible Application – Can be used on hydraulic, single or multiple lines and can remove encapsulation from flat-pack ranging from 11 x 11mm to 65 x 15mm.
- Reduced Time – Reduces time taken to remove encapsulation in comparison to knives or hacksaws.
- Adaptable – Power tools can be adapted to different line sizes by changing combinations of guides, wheels and hand strippers.

Ratings/Specifications.
